	DESCRIBE THE PI	RESENT AND OR	GINAL (if kn	own) PHYSIC	AL APPEARAN	CE		

This house is located on the Springfield Farm complex just northeast of Williamsport in Washington County, Maryland. It is situated on level ground and faces east.

The structure is a two story, three bay dwelling sheathed with ashestos siding. A two story, four bay el of higher elevation extends to the rear or west. The walls of the front section are of log or possibly early frame construction. The rear section appears to be of later frame construction.

Windows appear to be spaced evenly at the front elevation and in the rear el. First story windows at the facade have nine over six pane double hung sashes while those at the upper story have six over six light sashes. Other windows display two over two pane sashes. All window trim appears to be of the type associated with turn of the century construction.

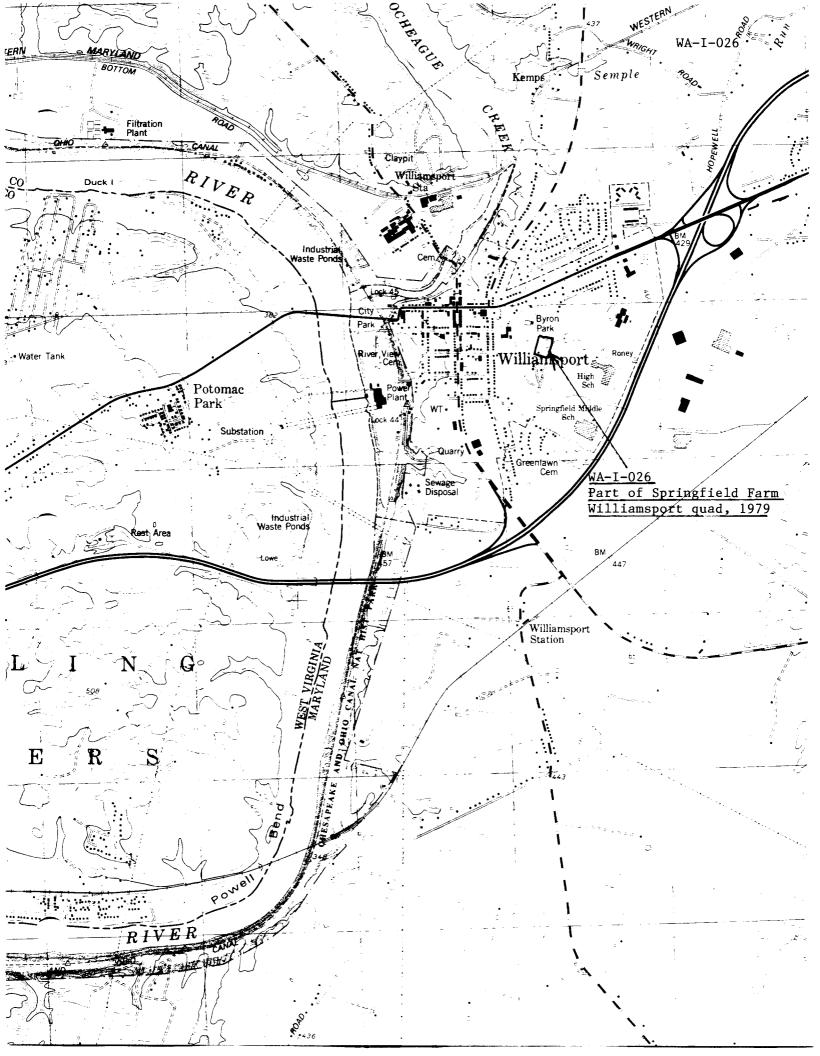

The main entrance is located in the south bay of the front or east elevation. The entranceway is trimmed similarly to the windows and includes a plain four light transom. A small roofed entrance porch shelters the front door. Other entrances are located at the first and second stories of the south elevation of the el where a double porch extends the lenght of the walls.

The roof is of sheet metal terminating at the ends with a tapered barge board trimmed with a bead. Simple boxing finishes the eaves. The roof of the rear addition is several feet higher than that of the front section. It is finished at the jointure of the two sections with a small hipped area. A brick chimney with several courses of corbeling at its top is located inside the south gabel end. Another brick chimney, also with corbeling extends from the interior of the el.

Immediately behind this dwelling is a small two story brick building, painted white and described as a wash house. It displays nine over six light windows held within narrow frames. North of the house is a large barn. The structures are in good to excellent condition. The property contains 81.57 acres.
